Data Flow Diagrams and User Stories

Date	28 October 2026
Team ID	EN25CS3010362
Project Name	Formula 1 Race Intelligence Dashboard
Maximum Marks	As per supplied template

Data Flow Diagram

This high-level diagram reflects the known implementation. The exact dataset file format and storage location were not confirmed in the supplied project materials.

Flow summary: Viewer → Render-hosted Flask website → published Tableau Dashboard or Story on Tableau Public. GitHub stores the web application source and deployment configuration.

Legend: Viewer = external entity; Flask website = entry-point process; Tableau Public = published analytics service; arrows = navigation and view-loading flow.

User Stories

User Type	Functional Requirement (Epic)	Story ID	User Story / Task	Acceptance Criteria	Priority	Release
Viewer (Web)	Access project	USN-1	As a viewer, I can open the project website to find the dashboard and Story.	Website loads and shows working Dashboard and Story links.	High	Release 1
Viewer (Web)	Open dashboard	USN-2	As a viewer, I can open the Tableau dashboard to explore Formula 1 metrics.	Dashboard opens and displays the available charts.	High	Release 1
Viewer (Web)	Open Story	USN-3	As a viewer, I can open the Tableau Story to follow a guided explanation.	Story opens and its story points can be navigated.	High	Release 1
Viewer	Review KPIs	USN-4	As a viewer, I can see record, season, and circuit coverage at a glance.	Screenshot shows 6,464 race records, 17 seasons, and 24 circuits.	High	Release 1
Viewer	Compare drivers	USN-5	As a viewer, I can	Driver names and	High	Release 1

			compare driver performance in a leaderboard.	the performance measure are readable.		
Viewer	Compare teams	USN-6	As a viewer, I can compare team performance.	Team names and ranking measure are displayed clearly.	High	Release 1
Viewer	Explore tyre usage	USN-7	As a viewer, I can review tyre-compound distribution and season-related usage.	Tyre categories and values are visible; seasonal calculations are validated before conclusions.	High	Release 1
Viewer	Explore reliability	USN-8	As a viewer, I can investigate DNF/retirement reasons.	Available DNF categories and related chart marks can be inspected.	Medium	Release 1
Viewer	Explore geography	USN-9	As a viewer, I can see race-hosting locations on a map.	Map is visible and described as host locations, not driver nationality.	Medium	Release 1
Viewer	Filter analysis	USN-10	As a viewer, I can filter by season, team, tyre compound, and DNF reason.	Visible filters respond and update their intended views; test live before demo.	High	Release 1
Viewer	Review podiums	USN-11	As a viewer, I can inspect podium achievements.	View loads; null values and aggregation are checked before citing exact totals.	Medium	Release 1
Project Maintainer	Maintain deployment	USN-12	As maintainer, I can update source code and review deployment.	Code is stored in GitHub and the deployment is hosted on Render; no automated deployment tests are claimed.	Medium	Release 1
