Communication

Date	28 October 2026
Team ID	EN25CS3010362
Project Name	Formula 1 Race Intelligence Dashboard

Communication Plan

This plan describes suitable communication channels for coordinating the project demonstration. Actual meeting history was not provided, so frequencies below are recommended working arrangements rather than claims that meetings already occurred.

S.No	Communication Type	Frequency	Channel / Tool	Participants	Purpose
1	Team Standup	Daily during active build/demo preparation	WhatsApp / in-person / short call	Project owner and any contributors	Share progress, priorities, and blockers.
2	Progress Update	Weekly	Shared checklist or message	Project owner and supervisor/mentor, if applicable	Review completed work, pending items, and next steps.
3	Issue / Bug Discussion	As needed	GitHub Issues / message / call	Project owner and relevant contributor	Record reproduction steps, impact, and resolution.
4	Stakeholder Review	At agreed milestones	Live dashboard review / online meeting	Project owner and reviewer	Collect feedback on usability, chart interpretation, and demo flow.
5	Final Demo Rehearsal	Once before submission/demo	Browser-based walkthrough	Presenter and available reviewers	Check links, dashboard/story access, narrative, and timing.

Communication Challenges & Resolutions

S.No	Challenge Faced / Identified	Resolution / Action Taken
1	Team ID and full team roster were not supplied with the project materials.	Keep Team ID as “Not provided” and avoid inventing member names; add official details before submission.
2	Dashboard charts may need validation where axes/aggregations or null indicators are unclear.	Check the underlying Tableau fields, aggregation, filters, and null records before presenting quantitative conclusions.
3	External Tableau views or the hosted website may take time to load during a live demo.	Open and test all links before the session; keep the Tableau URLs ready as direct fallbacks.
