# Customer Journey Map

| | |
|---|---|
| **Date** | 28 October 2026 |
| **Team ID** | En25cs3010362 |
| **Project Name** | Formula 1 Race Intelligence Dashboard |
| **Maximum Marks** | As per supplied template |

Map of the viewer's experience, including actions, touchpoints, thoughts, feelings, ownership, and opportunities.

| Journey Stage | Actions: What does the customer do? | Touchpoint: What do they interact with? | Customer Thought | Customer Feeling | Process Ownership | Opportunities |
|---|---|---|---|---|---|---|
| Stage 1 — Discover project | Opens the live project website. | Render-hosted Flask landing page. | “Where can I view the analysis?” | Curious; expects clear navigation. | Project owner / web application. | Make Dashboard and Story links prominent and add a short project description. |
| Stage 2 — Explore dashboard | Opens dashboard, reviews KPI cards/charts, and selects available filters. | Tableau Public dashboard; driver/team views, tyre usage, reliability, and map. | “Can I compare the results I care about?” | Engaged when labels are clear; confused if axes are unclear. | Dashboard author. | Validate calculations and nulls; improve labels/tooltips; test filter scope. |
| Stage 3 — Interpret and share | Compares results, follows Story, and shares project links. | Tableau Story, dashboard URL, GitHub repository. | “What conclusions are supported by the data?” | Confident when measures and limitations are explained. | Project owner / presenter. | Document data source and metric definitions; provide a guided narrative and fallback links. |

## Journey Summary

Discover website → explore Tableau dashboard → interpret results and share the project. The highest-value improvement is to validate chart calculations and document the dataset source so viewers can assess the findings.
