| Date | 28 October 2026 |
| Team ID | EN25CS3010362 |
| Project Name | Formula 1 Race Intelligence Dashboard |
| Maximum Marks | As per SkillWallet assessment rubric |

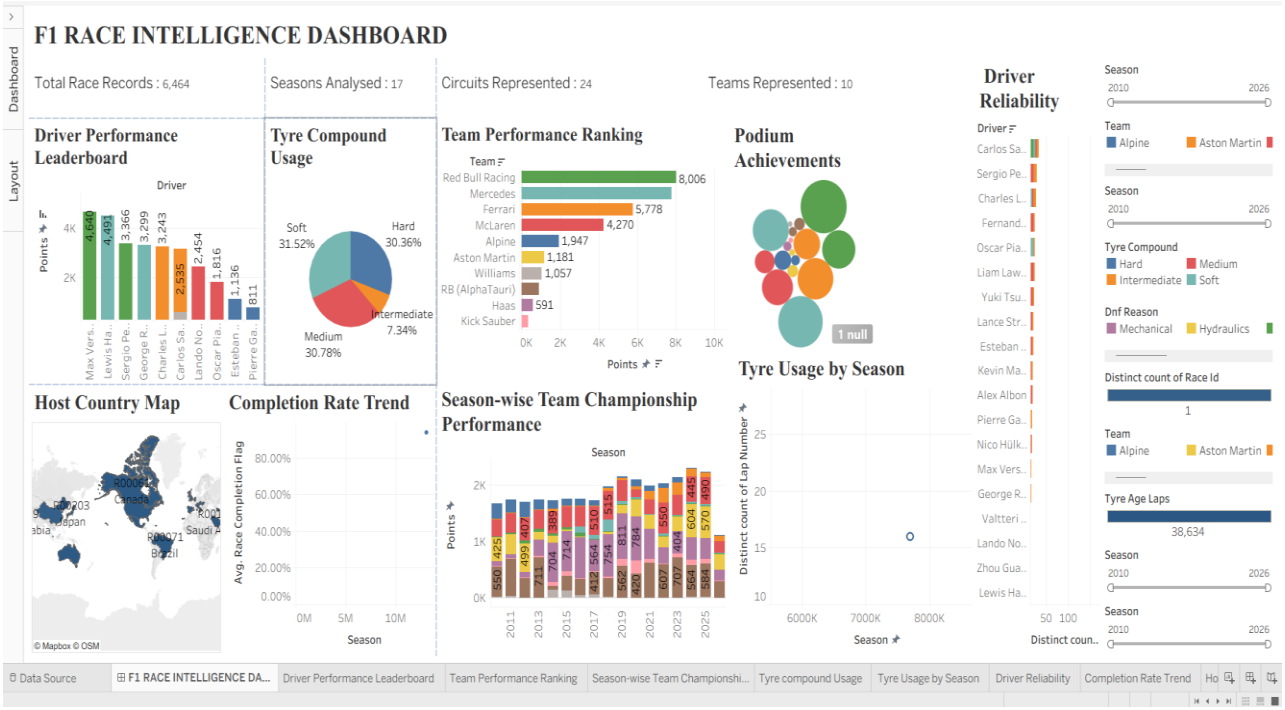

**Project Performance Testing:**

Project team shall fill the following information in model performance testing template.

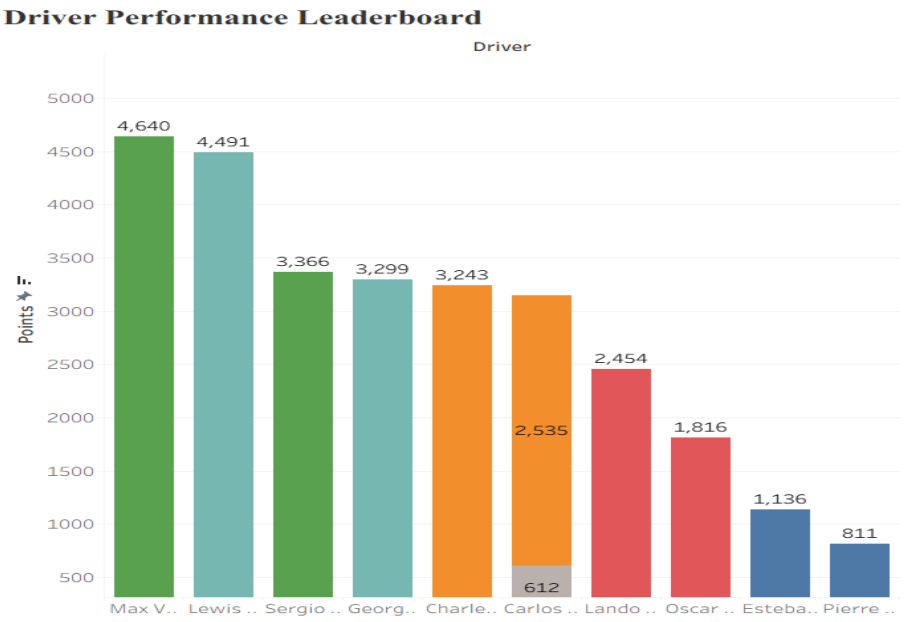

| S.No. | Parameter | Screenshot / Values |
|---|---|---|
| 1. | 1. Data Rendered | Dashboard KPI values visible in supplied screenshot: 6,464 total race records; 17 seasons analysed; 24 circuits represented. Full dashboard screenshot attached below. Rendering duration was not measured, so no load-time claim is made. |
| 2. | 2. Data Preprocessing | The dashboard is based on a prepared Formula 1 dataset. The supplied screenshot does not document the exact cleaning steps, null/duplicate counts, or preprocessing duration. These should be recorded from the actual data-preparation workflow if available. |
| 3. | 3. Utilization of Filters | Visible controls include Season, Team, Tyre Compound, DNF Reason, and additional fields/controls shown on the right side of the dashboard. Visual evidence is attached. Filter response times were not instrumented; functional response should be tested by selecting each filter and confirming all relevant views update. |
| 4. | 4. Calculation Fields Used | Visible aggregate metrics include total race records, seasons analysed, circuits represented, driver points, tyre-compound share, team performance, podium achievements, and completion rate. Exact Tableau calculated-field formulas were not supplied, so formulas are not inferred. |
| 5. | 5. Dashboard Design | 9 principal visualizations are identifiable in the supplied dashboard: Driver Performance Leaderboard; Tyre Compound Usage; Team Performance Ranking; Podium Achievements; Driver Reliability / DNF Reason; Host Country Map; Completion Rate Trend; Season-wise Team Championship Performance; Tyre Usage by Season. The filter panel is additional dashboard UI, not counted as a chart. |
| 6 | 6. Story Design | Tableau Story is published and linked from the project website. Story URL: https://public.tableau.com/views/f1tableauproject/Formula1RaceIntelligence. A separate story screenshot and exact number of story points were not provided, so the story-point count and story-specific render performance cannot be verified. |

# Visual Evidence – Tableau Dashboard

The full screenshot below has been cropped to remove the Windows taskbar. Individual chart crops follow for easier review.

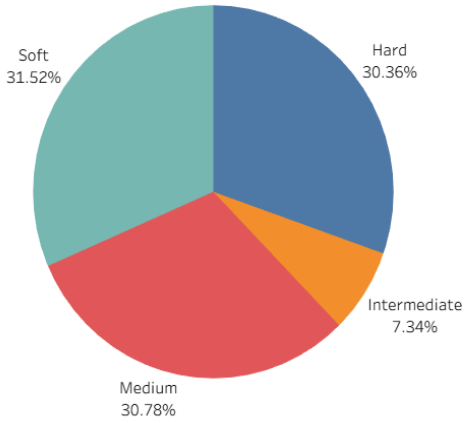

## 01 Driver Performance Leaderboard

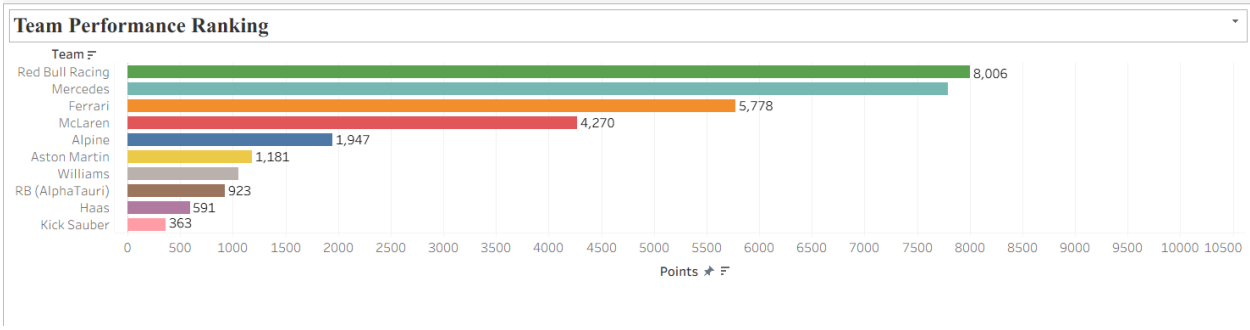

# 02 Tyre Compound Usage

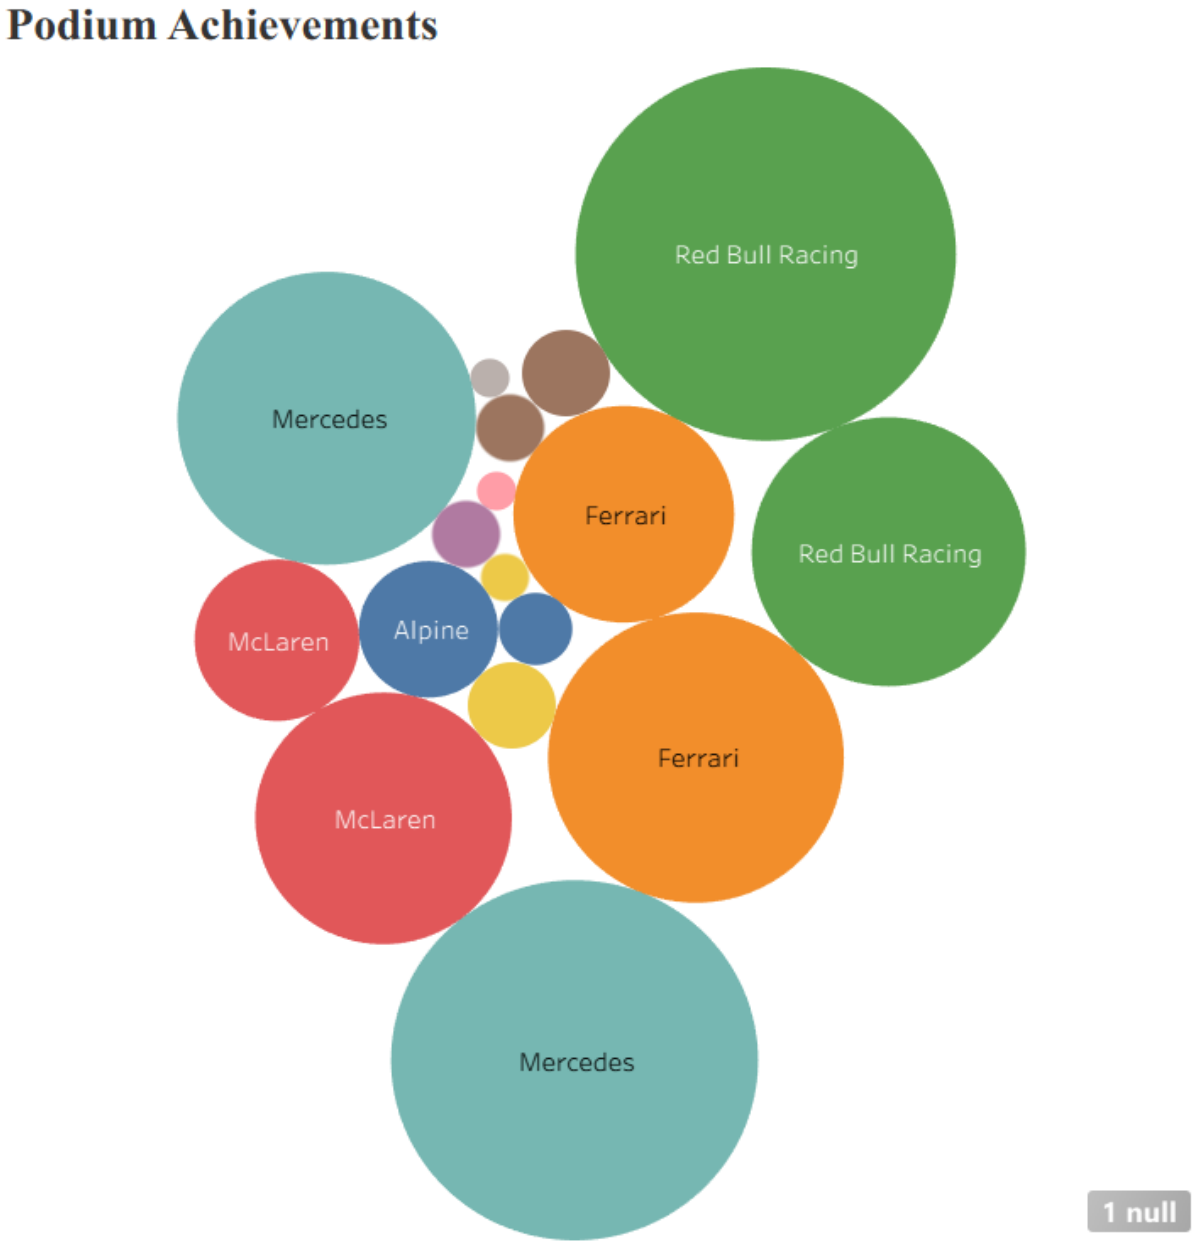

**Tyre Compound Usage**

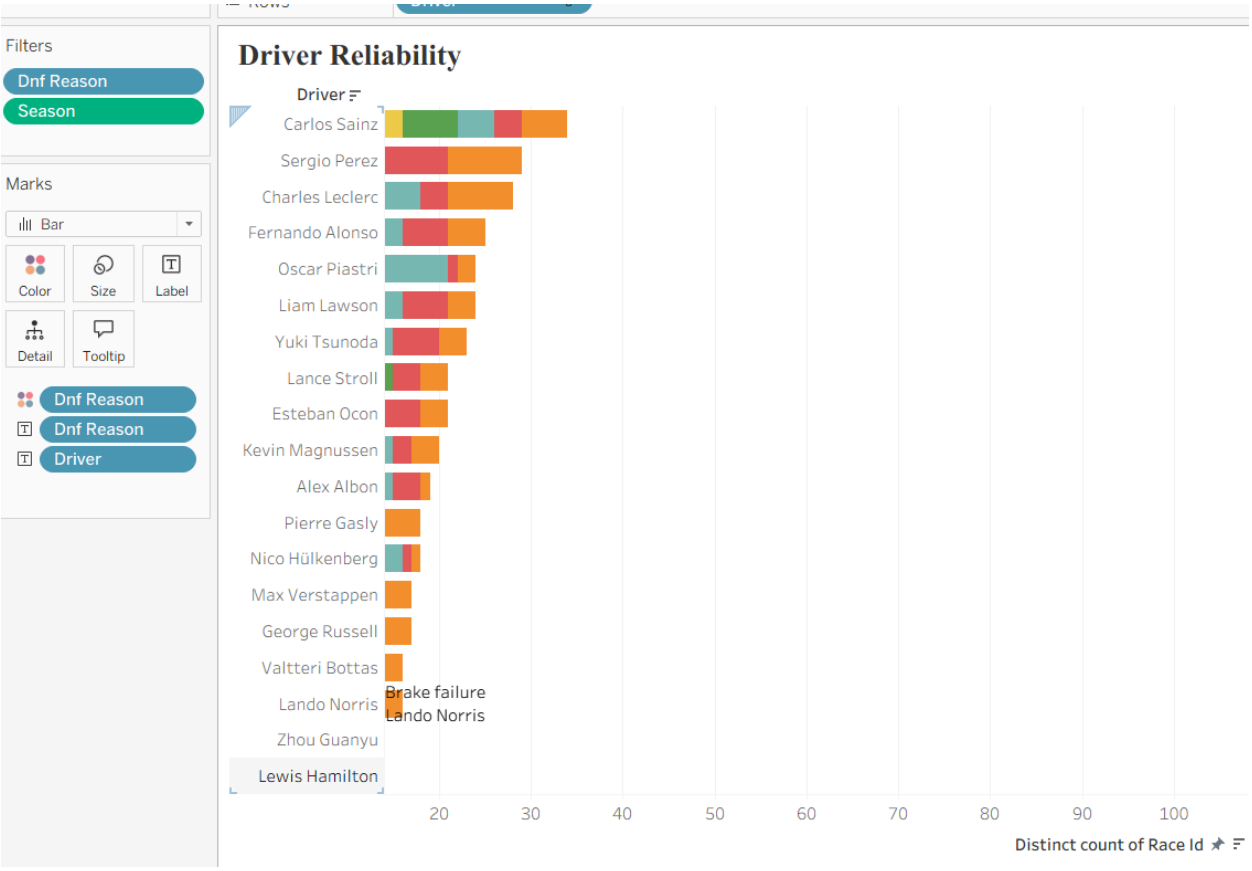

# 03 Team Performance Ranking

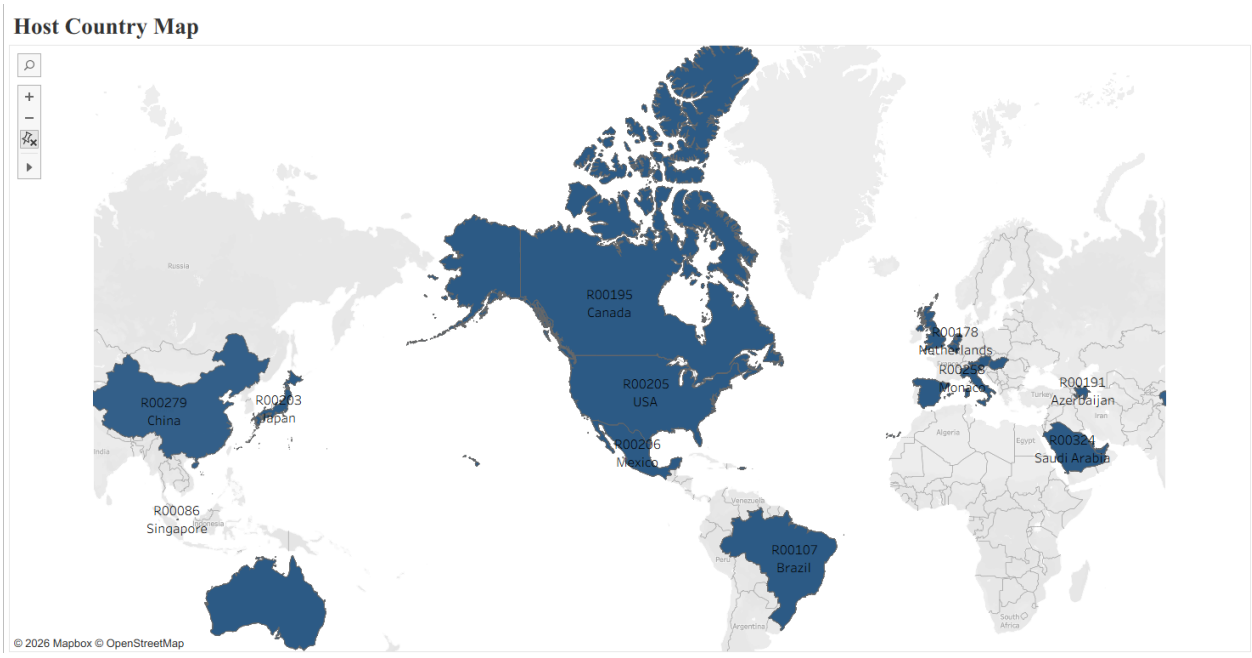

# 04 Podium Achievements

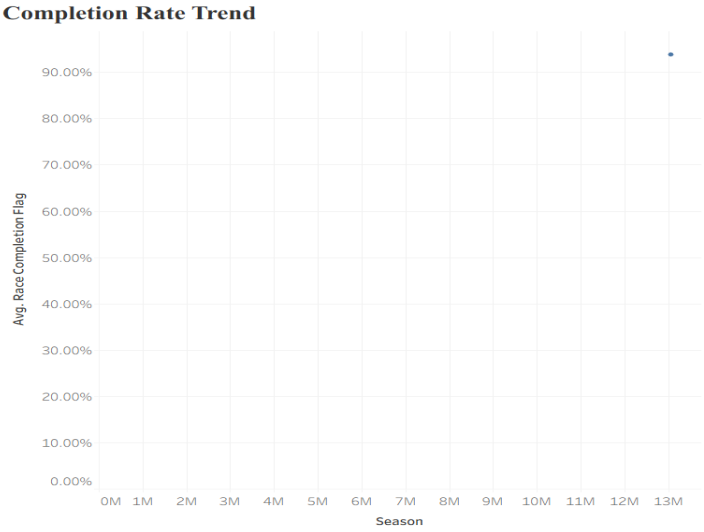

# 05 Driver Reliability

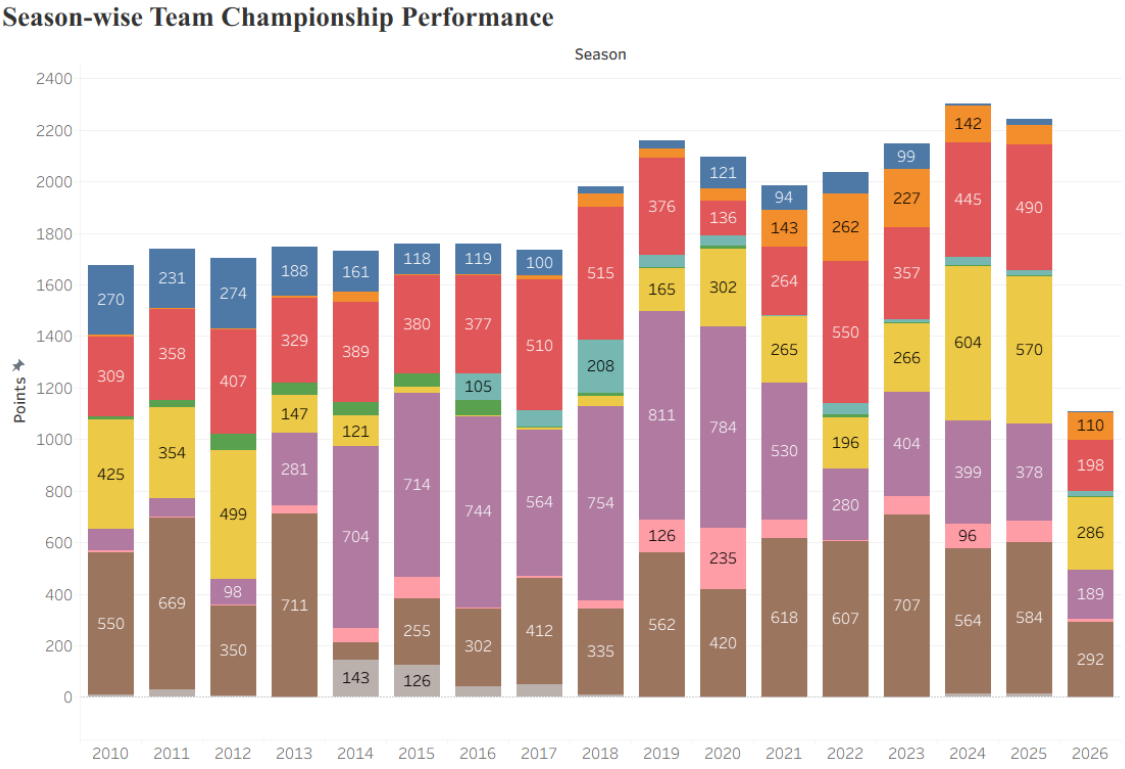

# 06 Host Country Map

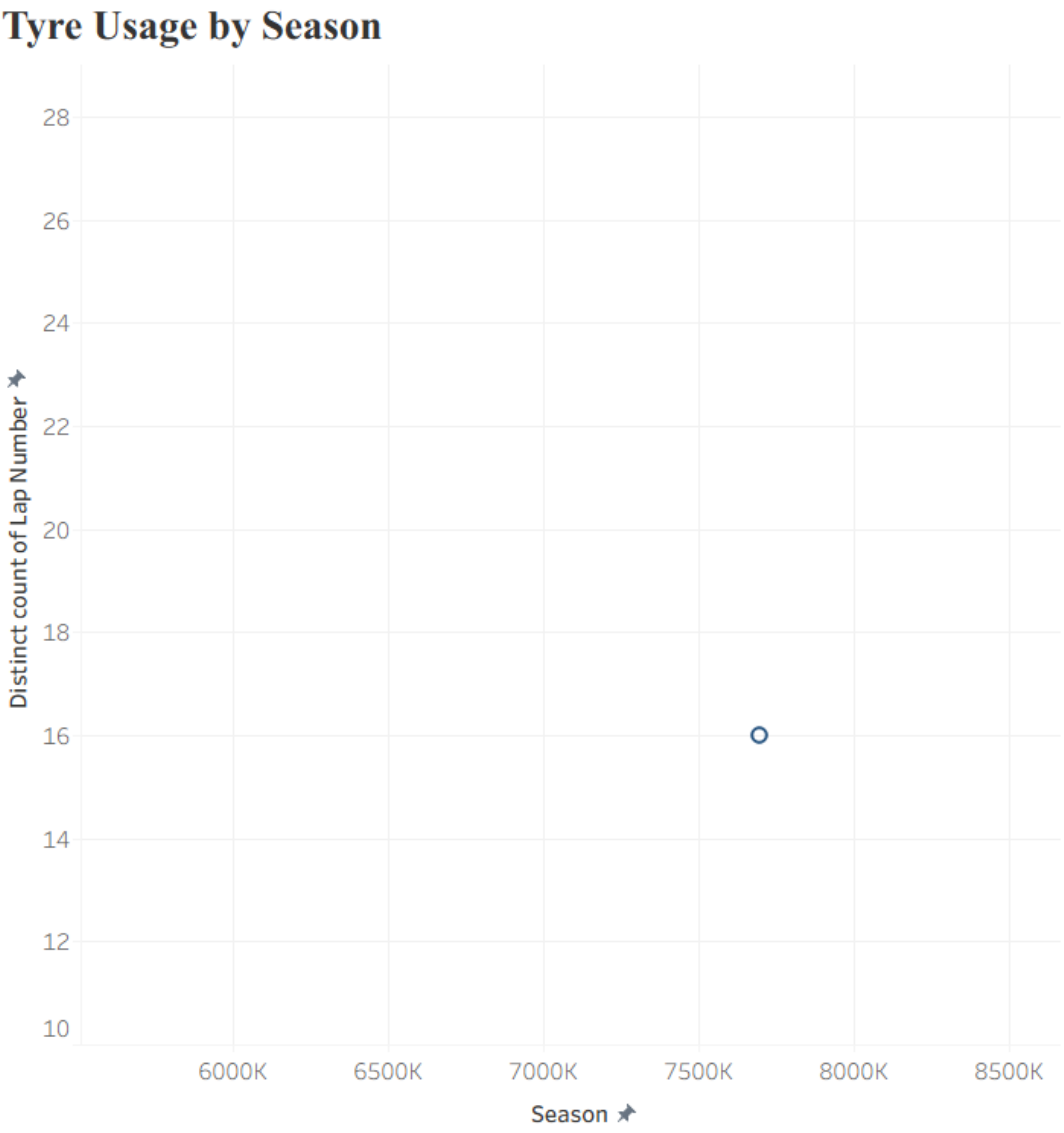

# 07 Completion Rate Trend

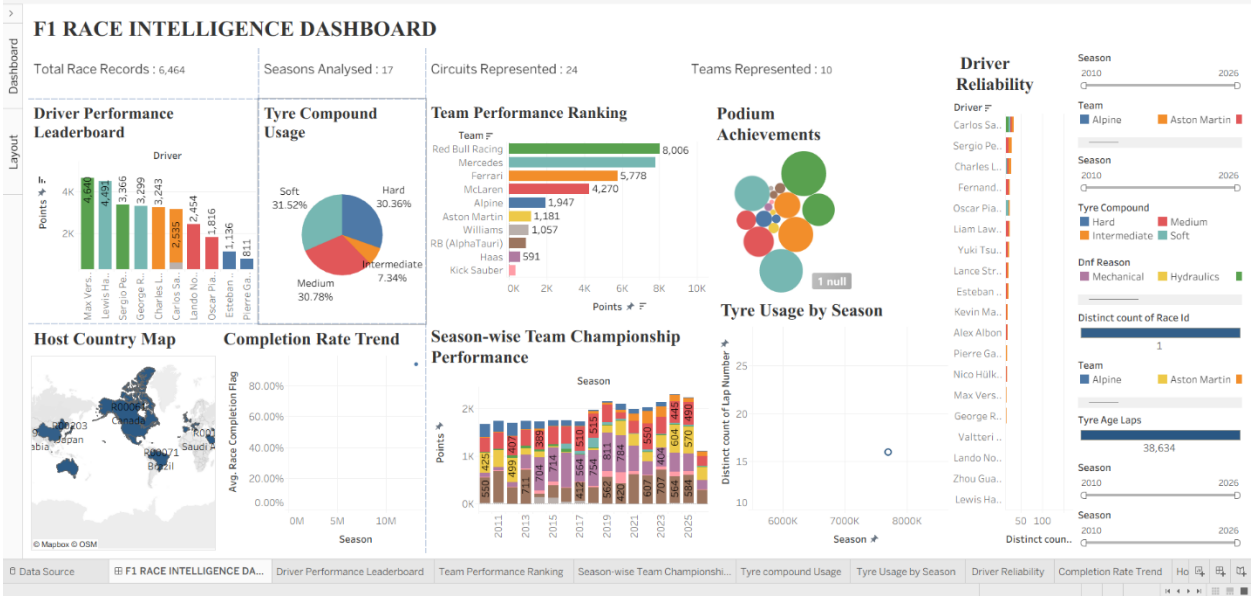

# 08 Seasonwise Team Championship

# 09 Tyre Usage by Season

# Dashboard filters

# Published project links
